# COOLING SYSTEMS OF SHARP

Direct Cooling

Natural convection in both fridge and freezer compartments

NanoFrost

Natural convection in both fridge and freezer compartments. Evaporator wrapped around the freezer.

Frost Free

Forced convection in freezer, natural convection in fridge. Separate air circulations in the compartments.

No Frost

Forced convection in both freezer and fridge compartments. Airs of fridge and freezer mixes.

Advanced No Frost

Forced convection in both freezer and fridge compartments. Two separate air circulation.

# LONGER FRESHNESS

### Advanced No Frost

Two independent and dedicated cooling system maximizes cooling and freezing results, ensuring frost free compartments whilst also stopping any missing of odors.

### Gentle Air Flow:

Maintains the fresh texture and taste of food by preventing any humidity loss in the fridge compartment.

# LONGER FRESHNESS

## E-Filter

E-filter technology helps to remove ethylene gas (a bio-product released naturally from the fresh foods) and unpleasant odors from the crisper. In this way, food stays fresh for a longer time.

## ZeroDegreeZone:

Creates optimum conditions for storing fresh meat and fish for longer period.

## Fruit&VegZone:

Ideal for storing fruit and vegetables keeping them fresh and crisp.

# LONGER FRESHNESS

## Humidity Control Technologies

With the humidity control technologies, adjustment of humidity levels to help preserve fruit and vegetables.

AdaptiFresh

AdaptiMoist

OptiMoist

# LONGER FRESHNESS

## OptiMoist

Allows adjustment of humidity levels to help preserve fruit and vegetables.

 *Only Vegetable Mode*

 *Fruit and Vegetable Mode*

 *Only Fruit Mode*

# LONGER FRESHNESS

Chiller

Crisper

## AdaptiZone

AdaptiZone is a special compartment that allows you to use the drawer as chiller or a crisper. With the switch on the back wall, you can change the functionality of the drawer according to your need.

# LONGER FRESHNESS

## AdvancedFresh

AdvancedFresh technology contains UVC LED, and air filter coated with TiO<sub>2</sub> photocatalyst by producing hydroxyl radicals. These radicals breaks airborne microorganisms down into harmless molecules, eliminate odor, bad smell by air circulation. Technology removes unpleasant odor up to %95 and destroys the bacteria up to %99.99

- Remove odors / Purifies air without need for filter replacement
- Removes bad odor and harmful microorganisms.
- Improves the air quality in the fridge.
- Keep foods fresher and increase the storage time.
- Deodorize: volatile organic compounds are responsible for the bad smell inside of refrigerators. The photocatalytic filter breaks bonds between VOC molecules and transforms them into harmless molecules to destroy bad smells.

# LONGER FRESHNESS

## VitaMod Technology

VitaMod can promote storing fresh and full of nutritional value produce due to having a special light that more closely matches the spectrum of natural sunlight. VitaMod maintains the natural ripening process to retain vitamin C and keep freshly picked fruit and vegetables.

### **VitaMod Technology protects**

- Vitamin C content of vegetables
- Antioxidant activity of vegetables

*\*Available only for SJ-BA44 Serie models.*

# FLEXIBILITY

## Nano Frost Cooling System

Nano Frost is the improved version of static cooling system. Thanks to usage of wrap around evaporator;

- More efficient cooling compared to static cooling system
- Less manual defrost requirement
- Higher and more flexible storage capacity

## AdaptiFreezer

AdaptiFreezer is even if at super low ( $-15^{\circ}\text{C}$ ) ambient temperatures, freezer section of the refrigerator maintain working to keep the frozen foods frozen. ( $-18^{\circ}\text{C}$ )

# FLEXIBILITY

## Water Dispenser

Continuously 2 liters chilled water availability and hygienic usage thanks to removable tank. There is no plumbing requirement.

## Dual Control

Temperatures and functions of fridge and freezer compartments can be controlled separately via electronic displays.

# FLEXIBILITY

## AdaptiLift

Adjust the height of the door racks to create more space for larger items. Easy to change height even it's loaded.

## AdaptiShelf

Slide and hide half the shelf to create more space for large and extreme sized items. Easy to managing space in fridge compartment.

## Space Saver Door

For conventional door mechanism, additional space for opened door is required. But, thanks to space saver door, the fridges can go right up the wall, no additional space needed.

# DESIGN

## Glass Door Material

Pretty glass door design, with stylish appearance and more resistance against scratches compared to metal sheet.

## Anti Finger Print

High Quality door material, helps prevents fingermarks, keeping your fridge looking shiny and new. (Only applicable for stainless steel materials)

# DESIGN

## Metal Cooling

- Shiny and stylish design
- Improved interior appearance
- Assisting on cooling

## TwinLED

Brighter compartment and better food visibility.  
Both sides installed LED evenly to light interior.

## SPECIFICATIONS

### Dimensions & Capacity

Vestel Platform	2764
Dimensions – WxDxH (cm)	54x55x177
Refrigerator Volume – L	181
Freezer Volume – L	70

### Characteristic

Cooling Technology	Nano Frost
Control Type	Mechanic
Energy Class ( A to G Scale)	E / D
Noise Level (dB)	38 / 38

### Equipment

Wine Rack	Available
AdaptiLift	Available
AdaptiShelf	No
Humidity Control Technology	No
ZeroDegreeZone	No
Ice Making Technology	Ice Tray
Metal Cooling	No
AdvancedFresh	No
E-Filter	No
Water Dispenser	No
Inverter	No
